

# Resusci Anne Advanced SkillTrainer

*Portable and convenient more advanced skills training*

The Resusci Anne Advanced SkillTrainer offers high quality, yet relatively low cost, advanced skills training. The combination of the remote control and PC SkillReporting software allows comprehensive instructor-to-student debriefing and documentation of key events. Additionally, first aid and extrication practice can be incorporated into the learning by adding the optional first aid and rescue limbs.

## Product benefits:

- Educationally effective by focusing on the core skills for ALS training
- Anatomically realistic airway allows training in basic to intermediate airway management with various adjuncts
- Cost efficient by offering key features needed for ALS training at an affordable price
- Modular design allows various limbs to be attached to enhance training
- Enhanced student and instructor motivation through use of the optional PC SkillReporting program

## Product features:

- Anatomically accurate airway allows for realistic practice of basic and intermediate airway interventions with various airway adjuncts including:
  - Oropharyngeal and nasopharyngeal airway insertion
  - Bag-Valve-Mask
  - LMA
  - Combitube®
  - Laryngeal Tube Airway
- IV arm provides proficiency in venipuncture and IV administration
- Live defibrillation allows users to incorporate live AED or manual defibrillators during the learning experience
- 4 connector 3-lead feature allows students to monitor ECG readings during training
- Automatically generated carotid pulses are synchronized with ECG and allow realistic pulse check during training
- Remote control provides cordless instructor control and intervention during training
- Modular design allows easy attachment to Resusci Anne CPR manikins
- PC SkillReporting software compatibility allows realtime CPR performance feedback and added cardiac rhythm introduction during training. A comprehensive performance report for after-action instructor-to-student debriefing may also be printed
